

INFORMATION PLANE · SURFACE CLASS

LOCAL EDITOR

CLASS ANATOMY · ROLE BORDERS · EDITING STATES · INLINE CONFIRM ·
ESCALATION · REFUSALS

- 01 COMPACT FRAME**
Surface fill #161618, 2px radius. Sized to the task — a small focused editor, never a full-screen surface.
- 02 OPERATION BORDER**
1px in the edit role border #7A3F3A. The border is the frame's only role signal.
- 03 MD PADDING**
16px on every side. The draft sets in UI type, brighter than any chrome around it.
- 04 SOFT SUBORDINATE SHADOW**
Lifts the frame off the workspace. Separation only — never a glow.
- 05 SOURCE STAYS VISIBLE**
The Note remains in view the whole time its text is edited.
- 06 BESIDE, NEVER OVER**
Anchored to the Content it serves. Never center-screen, never covering its source.

NOTE

Ask Priya whether the reading list still needs the two chapters on rivers before Friday.

EDIT · #E0A9A3 / #7A3F3A · TEXT SURFACES

RIVER-BEND.JPG

Fit 100%

- 64% +

VIEW · #9BB6E0 / #3F5F8A · VIEWERS

- 01

ONE CLASS, ONE VARIABLE

Fill, radius, padding, and shadow are identical across both frames. The 1px border is the only per-role change.
- 02

EDIT FOR TEXT

Text surfaces wear the edit border. The brighter edit fill appears only in small in-frame signals, never as chrome.
- 03

VIEW FOR VIEWERS

Inspection surfaces wear the view border; their controls read in view fill. Presentation never mutates the source.
- 04

NO SLATE HUE HERE

The slate family belongs to HUD surfaces. A local editor wearing it would claim the wrong class.

TE-01 · OPEN EDITING

NOTE

Framer confirmed Thursday — bring the two river prints and the walnut sample, not the oak.

ESC

TE-02 · DIRTY DRAFT

NOTE ●

Framer confirmed Thursday — bring the two river prints, the walnut sample, and the smaller mat.

ESC Cancel CTRL+ENTER Save

- 01

COMPLETE TEXT, CARET IN

The editor opens with the whole Note and a live caret. Nothing is truncated to fit; a long Note scrolls inside the frame.
- 02

TYPING NEVER COMMITS

The draft is local until Save. Escape on a clean draft dismisses silently — no question to answer.
- 03

QUIET DIRTY SIGNAL

A small edit-hue dot beside the label marks unsaved work. No banner, no asterisk in the text.
- 04

SAVE IS THE ONLY DURABLE WRITE

Ctrl+Enter saves, Escape cancels. Both read as quiet mono hints beside the actions, not as chrome.

ESCAPE ON A DIRTY DRAFT

NOTE ●

Framer confirmed Thursday — bring the two river prints, the walnut sample, and the smaller mat.

Discard unsaved changes?

Keep editing

Discard

01 THE ASK LIVES IN THE FRAME

Escape on a dirty draft renders the question inside the editor that owns the draft — same fill, same border, same frame.

02 NO FLOATING DIALOG EXISTS

Grove has no modal, no scrim, no dialog box. Nothing detaches from the surface it serves.

03 QUIET KEEP, INVALID DISCARD

The safe path is quiet text. Only the destructive act wears the invalid role, and only while the question is open.

04 THE DRAFT WAITS

The text dims behind a hairline but stays whole. Keep editing restores the caret exactly where it was.

WHEN A QUICK EDIT STOPS BEING QUICK

NOTE ●

Framer confirmed Thursday — bring the two river prints, the walnut sample, and the smaller mat. Draft the note to Priya about hanging order while I am there, and list which walls still need measuring.

- 01

A QUIET ROUTE, NOT A BUTTON

Escalation reads at reduced ink on the far side of the actions. It never competes with Save.
- 02

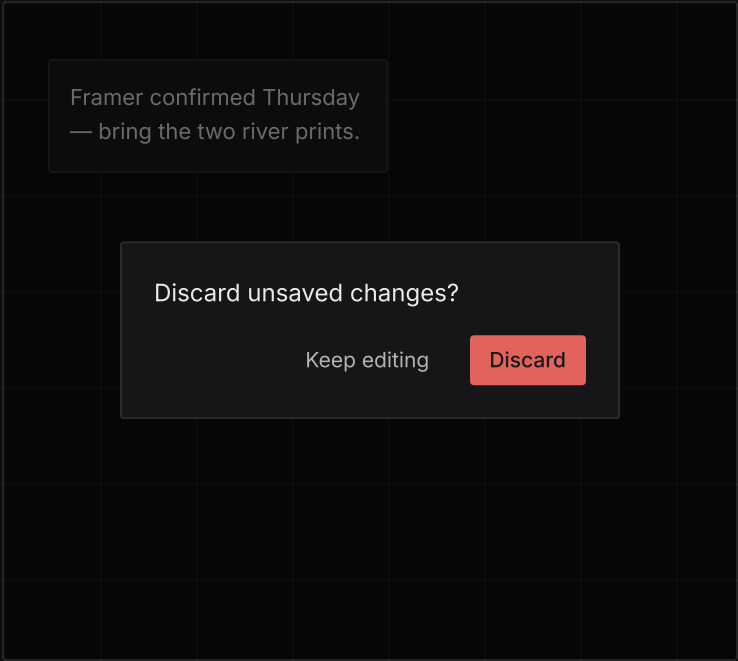

THE DRAFT TRAVELS

The current text — dirty state included — arrives in the Writing Slate intact. Nothing is lost in the move.
- 03

THE TAXONOMY SPLIT

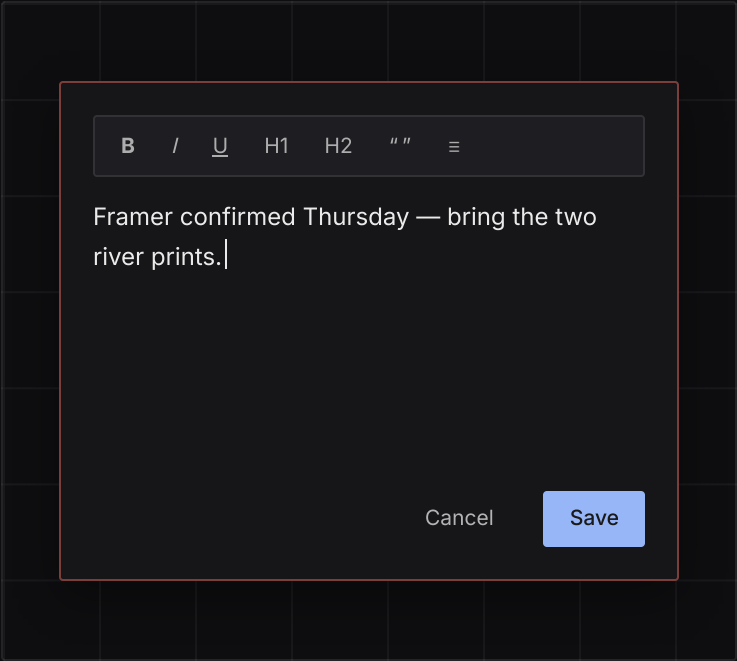

Quick edits live here, beside the source. Long-form work deliberately escalates to the HUD writing surface — toolbar, preview, and room to think live there, not here.

REFUSE · CENTERED MODAL

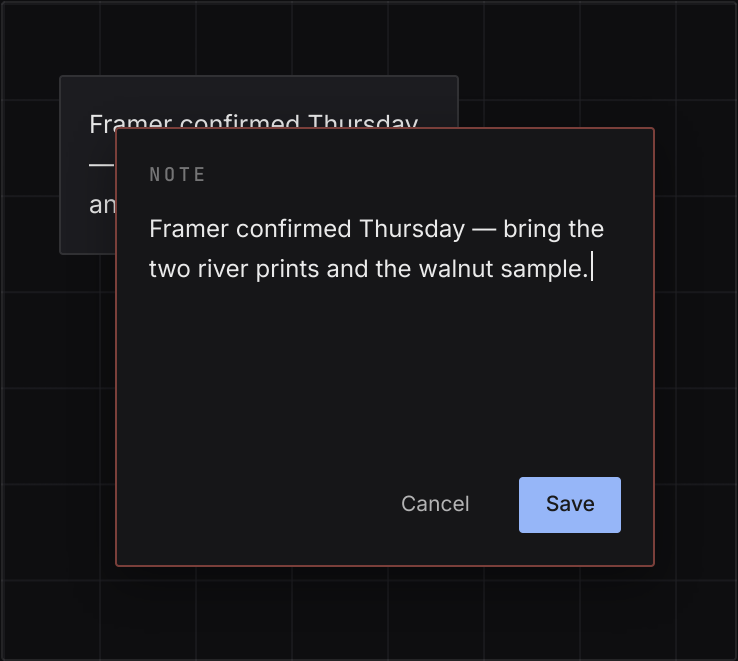

A scrim and a centered box detach the ask from its source. The question belongs inside the frame that asked it.

REFUSE · RICH TOOLBAR

Formatting chrome makes a small editor claim long-form work. That work escalates to the Writing Slate instead.

REFUSE · COVERING THE SOURCE

An editor over its own Note hides the thing being edited. The frame opens beside its source, which stays in view.
