

INFORMATION PLANE · FIXED CAPTURE

QUICK NOTE

THE CAPTURE FEED — SEVERAL THOUGHTS RECORDED BEFORE ANY ORGANIZING.

COMPOSER · SESSION FEED · KEY GRAMMAR · DURABLE MEMORIES · REFUSALS

QUICK NOTE

Pricing page idea — lead with the yearly plan and show the monthly cost beside it, so the saving is visible without a calculator.

Enter line break Shift+Enter save • next note Ctrl+Enter save • actions

10:42 AM Edit Discard

Met with Jamie — discussed launch timing and messaging. Align on audience and core benefit before the next review.

10:18 AM Edit Discard

Idea: a simple daily checkpoint to record wins and unblockers. Keep it under sixty seconds.

9:47 AM Edit Discard

Research: behavior change frameworks. Focus on tiny habits and consistency loops.

- 01

RESTRAINED IDENTITY

Surface title in display type at label scale. The name is the smallest claim on the page; input is the point.
- 02

COMPOSER FIRST, LARGEST

Multiline, content-first, caret visible, interaction-hue focus border. The largest type on the surface is the thought being typed — never chrome.
- 03

QUIET KEY GRAMMAR

Mono hints at reduced ink sit under the composer. They inform without competing with content.
- 04

COMPLETE SAVED NOTES

The session feed shows full multiline text in UI type. No one-line previews — reading a Note never requires opening it.
- 05

FIXED, NOT BESIDE-SOURCE

Opaque fill, quiet border, no role-tinted edge. A fixed capture surface reads differently from a local editor anchored to a source.

QUICK NOTE

Follow up with the design team on the empty state.
Two candidates so far — pick one before Friday.

Enter line break Shift+Enter save · next note Ctrl+Enter save · actions

1

2

3

01 ENTER — LINE BREAK

The default key extends the thought. A note is multiline by nature; committing it is never an accident of typing.

02 SHIFT+ENTER — SAVE, START NEXT

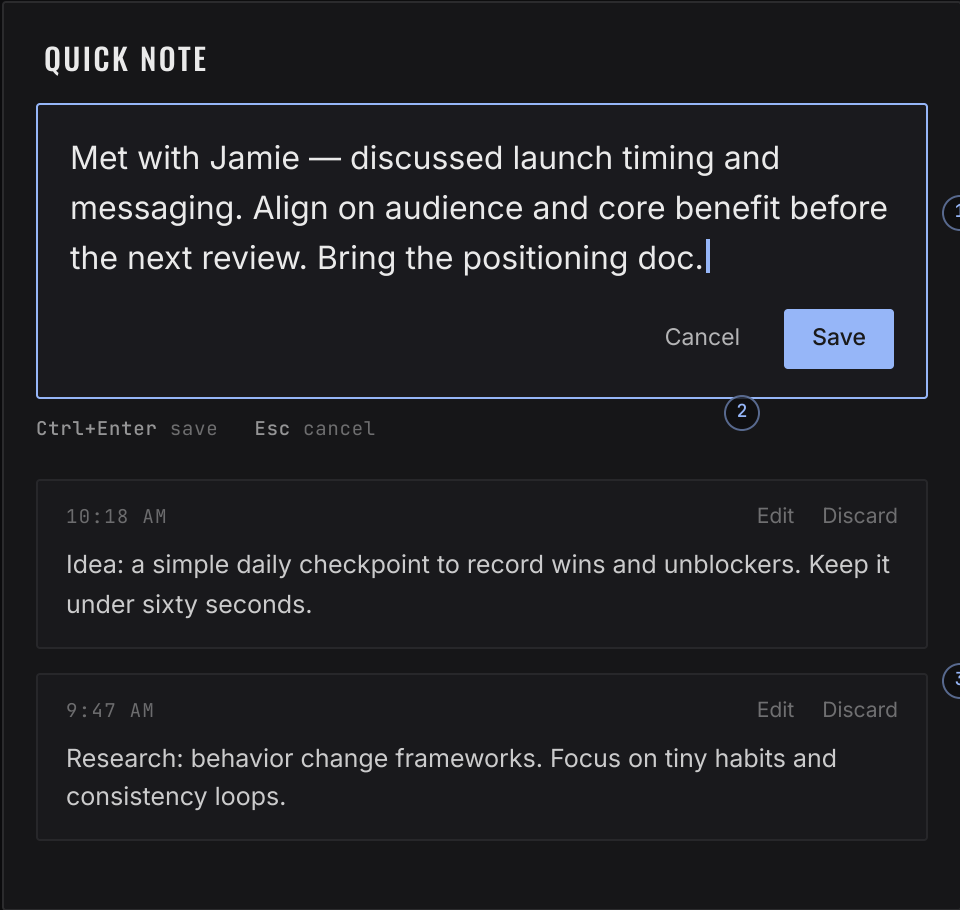

One chord commits the Note and returns an empty composer. The hands never leave the keyboard between thoughts.

03 CTRL+ENTER — SAVE, THEN ACT

Commits the Note and surfaces its follow-up actions. Acting on a thought is opt-in, one chord away — never forced.

04 MOMENTUM OWNS THE KEYS

Every chord ends with the composer ready again. Capture is a stream of entries, so the key grammar optimizes the next entry, not the current one's ceremony.

- 01

EDIT RETURNS TO THE COMPOSER

Choosing Edit on a saved Note moves its full text back into the composer. There is one editing place on this surface, and it is the composer.
- 02

SAVE UPDATES, NEVER DUPLICATES

Save commits the change to the same Memory. Cancel returns the Note to the feed unchanged. A second copy is never created.
- 03

DISCARD IS SURGICAL

Discard removes only its own item. Other saved Notes and the composer draft are untouched – there is no bulk destructive path here.
- 04

EXPLICIT EXITS WHILE EDITING

Save and Cancel are visible; escape cancels only the active edit. Saved Memories are never at risk from dismissal.

AT CLOSE • THREE SAVED, COMPOSER EMPTY

QUICK NOTE

Met with Jamie — discussed launch timing and messaging.
Align on audience and core benefit before the next review.

Idea: a simple daily checkpoint to record wins and unblockers.
Keep it under sixty seconds.

Edit Discard

Research: behavior change frameworks. Focus on tiny habits and consistency loops.

AFTER CLOSE • THE MEMORIES PERSIST

Met with Jamie — discussed launch timing and messaging. Align on audience and core benefit before the next review.

Idea: a simple daily checkpoint to record wins and unblockers. Keep it under sixty seconds.

Research: behavior change frameworks. Focus on tiny habits and consistency loops.

- ```
01 DURABLE WITHOUT A DESTINATION
 Each saved Note is already a Memory the
 moment it is saved. Nothing about
 closing decides whether the work
 survives.

02 CLOSE CLEARS ONLY TRANSIENTS
 Closing discards the empty composer
 state and the session feed view – never
 a saved Memory.

03 CAPTURE NEVER OWNS PLACEMENT
 Where a Memory goes later – a Layer, a
 Document, an Anchor – is an explicit
 action taken afterward, never a question
 asked during capture.
```

✕ ONE-LINE PREVIEW ROWS

Met with Jamie — discussed launch timing and mess...

3 itemsWork

A ROW THAT HIDES ITS OWN TEXT MAKES READING A SECOND STEP. A SAVED NOTE STAYS COMPLETE IN THE FEED — CANON FORBIDS TRUNCATION.

✕ TWO COMPETING PRIMARY BUTTONS

Idea: a simple daily checkpoint to record wins and unblockers.

SaveSave and close

TWO FILLED BUTTONS ASK THE PERSON TO RANK THEM. ONE ACTION IS PRIMARY; EVERY OTHER EXIT IS QUIET TEXT.

✕ CENTERED DIALOG WITH SCRIM

Save this note?

CancelSave

NOTHING FLOATS CENTER-SCREEN BEHIND A SCRIM — GROVE HAS NO MODAL. SAVING IS A KEYSTROKE IN THE COMPOSER, NOT AN INTERRUPTION.

✕ DESTINATION PICKER INSIDE CAPTURE

Research: behavior change frameworks. Focus on tiny habits.

Save to: IdeasSave

CAPTURE NEVER ASKS WHERE A THOUGHT BELONGS. A SAVED NOTE IS DURABLE WITH NO DESTINATION; PLACEMENT IS A LATER, EXPLICIT ACT.
